ABOUT US

Horticulturalists Judy, John, and Brenda welcome you to their gardens and are on site to assist you with your gardening needs and answer your questions. We love sharing our gardens with you! Please join us often throughout the spring, summer, and fall gardening season.

John Close, BSc Agriculture, is our “dirt and fert” (fertilizer) go to guy and our head grower. John is available to share his sustainable gardening and integrated pest management knowledge with you. Also known as “Farmer John”, he can help you find seeds, starter plants for your garden and produce from our fields for you to enjoy.

Judy Larkin is our “Queen of Daylilies.” Earthbound features Ontario grown and Canadian hybridized daylilies for purchase on site. Daylily display beds and gardens are at their peak in July. Native plants and wildflowers, and Earthbound’s “Don’t Dig It” campaign are also her obsession – ask her about her Wildflower Weddings.

Brenda Sutherland has a passion for lilies, and small flowering trees and shrubs including hardy own-root roses adapted for our Canadian winters. Always up for a new landscaping challenge, Brenda is available to help you refresh your current garden or design and install that new garden you’ve been dreaming about (and pinning on Pinterest!).
